

CITY OF
MITCHAM

WE'RE PLANTING NEW TREES IN YOUR STREET.

mitchamcouncil.sa.gov.au/trees

Council will plant new trees in your street in coming months. Our tree planting program stretches from April to September.

Each year we plant up to **1,800 trees** across our streets and reserves.

We've selected species that are best suited to local conditions and the streetscape.

How can I help?

You can help new trees grow by filling the well surrounding the tree with water once a week during the warmer months of the year.

What are the benefits?

Trees will grow to provide shade and cool our city. Tree planting improves amenity and provides habitat for native species.

City of Mitcham is a Tree City of the World, reflecting our commitment to protecting and enhancing our tree canopy.
